

Department of Statistics
Departmental Seminar Program
February – May 2018
Tuesdays 10:30 – 11:20
EMB 2-151

**Faculty of Natural and
 Agricultural Sciences**

Fakulteit Natuur- en Landbouwetenskappe
 Lefapha la Disaense tša Tlhago le Temo

DATE	PRESENTER	TOPIC
20 Feb	Dr Ina Louw	Sharpening your saw: Opportunities to learn how to teach smarter and not harder
27 Feb	Dr Janet van Niekerk	Statistically significant online lecturing...
6 Mar	Ms Brenda Mac'Oduol	Asymmetric generalizations of symmetric univariate probability distributions obtained through quantile splicing
13 Mar	Ms Iketle Maharela	The study of retention and graduation at South African universities: Survival analysis perspective
20 Mar	Ms Hayley Reynolds	A spatial sampling scheme for a road network
27 Mar	Ms Ansie Smit	Generic Statistical Tool for the Assessment of Hazard and Risk
17 Apr	Mr Hossein Masoumi Karakani	A Double Generally Weighted Moving Average chart for time between events
24 Apr	Mr Albert Mijburgh	Large sample theory – Application to the weighted Poisson
8 May	Ms Lisa Kirkland	Using statistical methods in game theory
15 May	Ms Seite Makgai	Beta-bivariate generated distributions and their applications
22 May	Ms Jocelyn Mazarura	Topic modeling for short text
